1. INTRODUCTION

1. PURPOSE

The Integrated Intelligence and Investigation System (IIS)- CyberCrime Investigation Portal is a web-based informational website developed to create awareness about cybercrime and cybercrime investigation. It provides visitors basic knowledge about different types of cybercrime, cybersecurity services, and common cyber threats, and important contact information in a simple and organised manner.

The primary purpose of the website is to educate the users about cybercrime, highlight the services involved in cybercrime investigation such as digital forensics and incident response and promote safe online practices. The Website also serves as an introductory platform for individuals who want to understand cybercrime investigation and cybersecurity.

2. SCOPE

The scope of this project is to develop a simple and responsive website that provides educational information related to cybercrime investigation.

The website contains the following sections:

- Home
- About cybercrime
- Services
- Common cybercrime cases
- Contact information

The website is intended for students, cybersecurity enthusiasts, and individuals interested in understanding cybercrime and its investigation.

3. STACK DEVELOPMENT

The project uses the following technologies:

- Frontend: HTML 5
- Styling: Basic HTML Elements (future enhancement with CSS)
- Programming language : HTML
- Development tool: Visual Studio Code
- Browser: Google Chrome / Safari

2. OVERALL DESCRIPTION

1. REQUIREMENTS

The cybercrime investigation portal is designed to provide visitors with basic information regarding cybercrime and cybersecurity. The website should present information in a simple, organized, and user friendly manner.

2. MODULE DESCRIPTION

The cybercrime investigation portal is divided into several modules.

- Home

Displays an introduction to the cybercrime investigation portal and explains its purpose.

- About cybercrime

Provides information about cybercrime and explains common cyber threats such as hacking, phishing, identity theft, and online fraud.

- Services

Displays cybersecurity-related services offered by the portal, including:

1. Digital forensics
2. Cyber threat analysis
3. Incident response
4. Evidence collection
5. Fraud investigation

- **Common Cybercrime cases**

Lists common cybercrime cases and displays an important cyber cases safety alert.

- **Contact information**

Displays official email address, phone number, and department address.

- **Sub-Modules Description**

1. **Navigation Menu**

Allows users to quickly navigate to different sections of the website.

2. **Security Alert**

Displays important online safety information to help users avoid cyber threats.

3. **Contact Details**

Provides communication information including email address, phone number and address.

3. FUNCTIONAL REQUIREMENTS

★ Software Requirements

The website is developed using HTML5 and basics of CSS to create a structured web page.

The project is created using Visual Studio Code as the development environment.

The website can be viewed using modern web browsers such as:

- Google chrome
- Microsoft edge

- Safari

Since the website is static, no backend software or database is currently required.

★ Hardware Requirements

For development:

Processor: intel core i3 or higher

RAM: 4 GB minimum

Storage: 20 GB free space

For Users:

desktop/laptop/mobile

Internet connection

Modern web browser

★ USER REQUIREMENTS

Users will be able to:

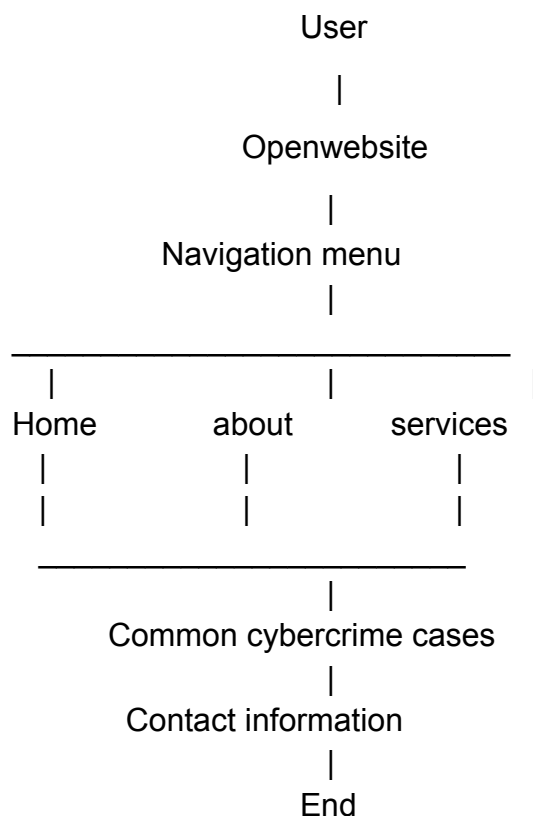

- Access the website through any browser.
- Navigate between different sections using the navigation menu.
- Read information about cybercrime
- Learn about cyber security services.
- View common cybercrime cases
- Read important security alerts
- Access contact information.

4. TABLE DESCRIPTION

module	description	user type
home	Displays the introduction of the cybercrime investigation portal	visitor
About	Explains cybercrime and common cyber	visitor

	threats	
services	Lists cybersecurity investigation services	visitor
Common cases	Displays common cybersecurity cases and security alerts	visitor
contact	Shows email, phone number, and address	visitor
navigation	Allows users to move between sections of the website	visitor
